

## **Read Your Meter To Help The Environment**

Some months ago you received an Energy Enquiry Form but not all parishes completed the questionnaire. This information is very important to enable us to purchase energy in bulk at a cheaper rate and possibly buy Green energy as opposed to Brown, to help the environment. Therefore your supporting data will enable us to make an informed decision as to whether this is feasible.

Under the leadership of the Bishop of London the Diocese is considering its environmental policy and this will be a key component of this policy. Our aspiration is to be able to buy Green energy in bulk at a similar price that churches would be paying if purchasing Brown.

The most important information in completing the form is as follows:

### **Electricity**

The **MPAN** or Meter Point Administration Number starts with the letter 'S' and is a 21 digit number as follows: XX XXX XXX XX XXXX XXXX XXX and is usually arranged in a series of boxes noticeable on any bill or invoice.

### **Gas**

The MPR or Meter Point Reference number is an 8 to 12 digit number found on any gas bill or invoice.

Both of these numbers should not be confused with the meter number or account reference number.
